Subject Index

Adhesion
antibiotic, surface activity; 423
endothelial cell, methacrylate; 323
platelet, polyurethane; 458
Adhesive
dental market, mechanical properties; 473
Adsorption
collagen, diffusion coefficient; 105
Albumin
collagen, vascular prosthesis, Dacron; 118
microcapsules, drug delivery; 211
prosthesis, polyester, sterilization; 185
Alginate
methacrylate, microencapsulation; 449
Antibiotic
surface activity, adhesion; 423
Anticoagulant
sulphonate, heparin; 190
Antithrombin III
polysaccharide, dextran; 24, 100, 248
Arterial prosthesis
polyethylene, coating; 433
Aspartic acid
biodegradation, drug delivery; 407
Bilirubin
X-ray photoelectron spec (XPS), polyurethane, vascular graft; 94
Bioactive glass
bone, osteoblasts; 275
ceramic, hydroxyapatite, bone; 234
Biochemical analysis
polymers, connective tissue; 242
Biocompatibility
NiCrMo alloy, dental material; 385
Biodegradation
aspartic acid, drug delivery; 407
bone, calcium phosphate; 308
bone fixation, poly(L-lactide); 311
nylon pouch, clips; 315
polymers, tartronic acid; 353
poly(hydroxybutyrate), poly(hydroxyvalerate); 129, 289
vascular graft, neoarteries; 418
Biointeractions '87
Conference Report; 415CR
Biological and Biomechanical Performance of Biomaterials
Book Review; 158BR
Blood
fibrin, elastin, thrombin; 217
Blood compatibility
polyethylene, polyHEMA, polyDHDMA; 57
Blood-material interaction
platelet, polyamide, hydrogel; 231
polyurethane, ESCA; 329
Bologna
Conference Report, European Congress Biomaterials; 78CR
Bone
bioactive glass, osteoblasts; 275
calcium phosphate, biodegradation; 308
ceramic, hydroxyapatite, bioactive glass; 234
collagen, osteons; 427
protein, calcium phosphate; 442
Bone fixation
poly(L-lactide), biodegradation; 311
poly(L-lactide), mandibular fractures; 70
Bone plate
hip, fatigue fracture; 153
Book Review
Biological and Biomechanical Performance of Biomaterials; 158BR
Corrosion and Degradation of Implant Materials; 158BR
Intraocular Lenses; 237BR
Pacemaker Leads; 237BR
Polyurethanes in Medicine; 79BR
Bovine tendon
prosthesis, ligament, glutaraldehyde; 146
Burn
water vapour loss, wound dressing; 367
wound dressing, conformability; 372
Calcification
polyHEMA-collagen; 30
Calcium phosphate
bone, biodegradation; 308
protein, bone; 442
Carbon composites
haemocompatibility, cardiovascular devices; 18

Cardiovascular devices
carbon composites, haemocompatibility; 18
Cell seperation
immunology, microspheres; 341
Cells
microencapsulation, HEMA-MMA; 360
Cell-polymer interaction
polyurethane, surface free energy; 207
Ceramic
hydroxyapatite, bioactive glass, bone; 234
Chitosan
coating, surface; 481
Clips
nylon pouch, biodegradation; 315
Coating
chitosan, surface; 481
polyethylene, arterial prosthesis; 433
TiN, CoCrMo alloy; 477
Collagen
albumin, vascular prosthesis, Dacron; 118
diffusion coefficient, adsorption; 105
fibroblast, hyaluronic acid, fibronectin; 195
osteons, bone; 427
sepiolite, fibroblast; 35, 67
Complement activation
intraocular lenses, PMMA; 285
Conference Report
Biointeractions '87; 415CR
Electrical stimulation, Vienna; 77CR
European Congress Biomaterials, Bologna; 78CR
Conformability
wound dressing, burn; 372
Connective tissue
polymers, biochemical analysis; 242
Contact lenses
hydrogel, deposits; 83, 89
hydrogel, light microscopy, SEM; 172
Copolymerization
polymers, polyHEMA; 404
Corrosion
fracture fixation, stainless steel; 177
Corrosion and Degradation of Implant Materials
Book Review, 158BR
CoCrMo alloy
TiN, coating; 477
toxicity, fibroblasts; 377
Cracking
stainless steel, nickel, fracture fixation; 228
Dacron
albumin, collagen, vascular prosthesis; 118
Densitometry
methacrylate, dental material; 53
Dental amalgam
mercury; 296, 301
mercury, particle; 401
Dental material
adhesive, mechanical properties; 473
biocompatibility, NiCrMo alloy; 385
methacrylate, densitometry; 53
methacrylate, stress; 393
prosthesis, polyamide; 38
tooth surface, temperature; 411
Deposits
contact lenses, hydrogel; 83, 89
Dextran
polysaccharide, antithrombin III; 24, 100, 248
Diffusion
formaldehyde, sterilization; 346
Diffusion coefficient
collagen, adsorption; 105
Drug delivery
albumin, microcapsules; 211
biodegradation, aspartic acid; 407
polyHEMA, testosterone; 124
polypropylene, membrane; 265
Ear
polymers, SEM; 254
Elastin
blood, fibrin, thrombin; 217
Electret
kidney stone; 503
Electrical Stimulation
Conference Report, Vienna; 77CR
Embolization
polyHEMA, hydrogel; 142
Endothelial cell
adhesion, methacrylate; 323
Epoxy resin
polymers, mechanical properties; 162
ESCA
polyurethane, blood-material interaction; 329
European Congress Biomaterials
Conference Report, Bologna; 78CR
Fatigue fracture
hip, bone plate; 153
Fatigue properties
prosthesis, Ti alloy; 223
Fibrin
blood, elastin, thrombin; 217
Fibroblast
collagen, hyaluronic acid, fibronectin; 195
collagen, sepiolite; 35, 36
polyurethane; 464
Fibroblasts
toxicity, CoCrMo alloy; 377
Fibronectin
collagen, fibrobalst, hyaluronic acid; 195
Formaldehyde
diffusion, sterilization; 346
Fracture fixation
corrosion, stainless steel; 177
PGA/PLA copolymers, mechanical properties; 42
polyglycolide (PGA) rods, mechanical properties; 46
stainless steel, nickel, cracking; 228
Glucose
immobilization, polyHEMA; 489
Glutaraldehyde
pericardium, stress; 201
prosthesis, ligament, bovine tendon; 146
Haemocompatibility
carbon composites, cardiovascular devices; 18
surface, polyurethane; 259
HEMA-MMA
microencapsulation, cells; 360
Heparin
poly(amido-amine), polyurethane; 61, 306
sulphonate, anticoagulant; 190
vascular graft, thrombin; 496
Hip
fatigue fracture, bone plate; 153
Hyaluronic acid
collagen, fibroblast, fibronectin; 195
Hydrogel
blood-material interaction, platelet, polyamide; 231
contact lenses, deposits; 83, 89
contact lenses, light microscopy, SEM; 172
polyHEMA, embolization; 142
urinary catheter, SEM; 500
Hydroxyapatite
ceramic, bioactive glass, bone; 234
Immobilization
glucose, polyHEMA; 489
Immunology
microspheres, cell separation; 341
Inflammation
neuroprosthetic implants; polymers; 138
Intraocular lenses
Book review; 237BR
complement activation; PMMA; 285
Kidney stone
electret; 503
Leucocyte interactions
polyethylene, polydimethylsiloxane; 12
Ligament
prosthesis, glutaraldehyde, bovine tendon; 146
Light microscopy
contact lenses, hydrogel, SEM; 172
Macrophages
polyoxamers, polystyrene, phagocytosis; 113
Mandibular fractures
bone fixation, poly(L-lactide); 70
Mechanical properties
adhesive, dental material; 473
PGA/PLA copolymers, fracture fixation; 42
polyglycolide (PGA) rods, fracture fixation; 46
polymers, epoxy resin; 162
Membrane
drug delivery, polypropylene; 265
sodium alginate, permeability; 397
Mercury
dental amalgam; 296, 301
dental amalgam, particle; 401
Methacrylate
adhesion, endothelial cell; 323
alginate, microencapsulation; 449
densitometry, dental material; 53
dental material, stress; 393
Microcapsules
albumin, drug delivery; 211
Microencapsulation
alginate, methacrylate; 449
cells, HEMA-MMA; 360
Microspheres
immunology, cell separation; 341
Neoarteries
vascular graft, biodegradation; 418
Neuroprosthetic implants
polymers, inflammation; 138
Nickel
stainless steel, fracture fixation, cracking; 228
NiCrMo alloy
biocompatibility, dental material; 385
Nylon pouch
biodegradation, clips; 315
N-vinylpyrrolidone
thrombogenesis, polyHEMA; 74
Osteoblasts
bioactive glass, bone; 275
Osteons
collagen, bone; 427
Pacemaker Leads
Book Review; 237BR
Particle
mercury, dental amalgam; 401
Pericardium
glutaraldehyde, stress; 201
Permeability
sodium alginate; membrane; 397
PGA/PLA copolymers
mechanical properties, fracture fixation; 42
Phagocytosis
macrophages, polyoxamers, polystyrene; 113
Platelet
adhesion, polyurethane; 458
blood-material interaction, polyamide, hydrogel; 231
PMMA
intraocular lenses, complement activation; 285
Polyamide
blood-material interaction, platelet, hydrogel; 231
prosthesis, dental material; 38
polyDHDMA
polyethylene, blood compatibility, polyHEMA; 57
Polydimethylsiloxane
polyethylene, leucocyte interactions; 12
Polyester
prosthesis, albumin, sterilization; 185
Polyethylene
arterial prosthesis, coating; 433
blood compatibility, polyHEMA,

polyDHDMA; 57
polydimethylsiloxane, leucocyte interactions; 12
Polyglycolide (PGA) rods
mechanical properties; fracture fixation; 46
polyHEMA
drug delivery; testosterone; 124
immobilization, glucose; 489
hydrogel, embolization; 142
polyethylene, blood compatibility, polyDHDMA; 57
polymers, copolymerization; 404
thrombogenesis, N-vinylpyrrolidone; 74
polyHEMA–collagen
calcification; 30
Polymers
biodegradation, tartronic acid; 353
connective tissue, biochemical analysis; 242
copolymerization, polyHEMA; 404
ear, SEM; 254
mechanical properties, epoxy resin; 162
neuroprosthetic implants, inflammation; 138
Polyoxamers
macrophages, polystyrene, phagocytosis; 113
Polypropylene
drug delivery, membrane; 265
Polysaccharide
antithrombin III, dextran; 24, 100, 248
Polystyrene
macrophages, polyoxamers, phagocytosis; 113
Polyurethane
cell–polymer interaction, surface free energy; 207
ESCA, blood–material interaction; 329
fibroblast; 464
heparin poly(amido-amine); 61, 306
platelet, adhesion; 458
surface, haemocompatibility; 259
vascular graft, prosthesis; 3
X-ray photoelectron spec (XPS), vascular graft, bilirubin; 94
Polyurethanes in Medicine
Book Review; 79BR
Poly(amido-amine)
heparin, polyurethane; 61, 306
Poly(hydroxybutyrate)
poly(hydroxyvalerate), biodegradation; 129, 289
Poly(hydroxyvalerate)
poly(hydroxybutyrate), biodegradation; 129, 289
poly(L-lactide)
bone fixation, biodegradation; 311
bone fixation, mandibular fractures; 70
Potassium alginate
tissue reaction; 49
Prosthesis
dental material, polyamide; 38
ligament, glutaraldehyde, bovine tendon; 146
polyester, albumin, sterilization; 185
polyurethane, vascular graft; 3
Ti alloy, fatigue properties; 223
Protein
bone, calcium phosphate; 442
SEM
contact lenses, hydrogel, light microscopy; 172
hydrogel, urinary catheter; 500
polymers, ear; 254
Sepiolite
collagen, fibroblast; 35, 67
Sodium alginate
membrane, permeability; 397
Stainless steel
corrosion, fracture fixation; 177
nickel, fracture fixation, cracking; 228
Sterilization
diffusion, formaldehyde; 346
prosthesis, polyester, albumin; 185
Stress
methacrylate, dental material; 393
pericardium, glutaraldehyde; 201
Sulphonate
anticoagulant, heparin; 190
Surface
chitosan, coating; 481
haemocompatibility, polyurethane; 259
Surface activity
antibiotic, adhesion; 423
Surface free energy
cell–polymer interaction, polyurethane; 207
Tartronic acid
polymers, biodegradation; 353
Temperature
tooth surface, dental material; 411
Testosterone
polyHEMA, drug delivery; 124
Thrombin
blood, fibrin, elastin; 217
heparin, vascular graft; 496
Thrombogenesis
N-vinylpyrrolidone, polyHEMA; 74
Ti alloy
prosthesis, fatigue properties; 223
TiN
coating, CoCrMo alloy; 477
Tissue reaction
potassium alginate; 49
Tooth surface
temperature, dental material; 411
Toxicity
CoCrMo alloy, fibroblasts; 377
Urinary catheter
hydrogel, SEM; 500
Vascular graft
biodegradation, neoarteries; 418
heparin, thrombin; 496
polyurethane, prosthesis; 3
X-ray photoelectron spec (XPS), polyurethane, bilirubin; 94
Vascular prosthesis
albumin, collagen, Dacron; 118
Vienna
Conference Report, Electrical Stimulation; 77CR
Water vapour loss
burn, wound dressing; 367
Wound dressing
conformability, burn; 372
water vapour loss, burn 367
X-ray photoelectron spec (XPS)
polyurethane, vascular graft, bilirubin; 94
